

JOB POSTING

ENVIRONMENTAL/QUALITY ASSURANCE SUPERVISOR

LOCATION: Superior, WI

COMMENTS ON IMMIGRATION: If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

DUTIES AND RESPONSIBILITIES:

- Assist plant management to ensure the highest standards are achieved in terms of environmental compliance, product quality, plant efficiency and availability.
- Working in a team environment, coordinate and manage multiple projects and assignments, analyze process data, troubleshoot plant operations, and assist in the implementation of solutions.
- Implement Quality Management Systems (QMS) in coordination with corporate QMS team.
- Supervise the Quality Assurance Lab and oversee analytical testing methods including but not limited to: wet bench methodology, XRF, LECO Carbon, and Sulfur Analysis.
- Coach and develop lab/environmental technicians and plant employees to perform at their highest level.
- Continual monitoring of plant processes and timely reporting of quality and environmental related issues.
- Ensure compliance with all internal and external environmental and regulatory requirements.
- Oversight of all compliance and monitoring activities; preparation and submission of all permit required environmental reports.
- Support CEM equipment and flue gas analyzers used in air quality control and combustion monitoring equipment.
- Perform “On call” duties on rotation with the supervisory team.
- Be a part of an effective team within the plant that works well with other functions; sales, marketing, finance, human resources, engineering and ESGQA.
- Other duties and projects as assigned.

QUALIFICATIONS:

- Proven track record of developing and maintaining a safe work culture.
- Proven teambuilding and leadership skills.
- A combination of five years education or applicable industrial experience in the area of quality control or environmental compliance.
- Excellent communication (verbal & written) skills.
- Proficient in Microsoft systems and other business/technical applications with a proven track record of learning new systems.
- Strong analytical and problem solving skills.
